Version: 12.0

Question: 1
What is the First Step required in preparing a computer for forensics investigation?
A. Do not turn the computer off or on, run any programs, or attempt to access data on a computer B. Secure any relevant media
C. Suspend automated document destruction and recycling policies that may pertain to any relevant media or users at Issue
D. Identify the type of data you are seeking, the Information you are looking for, and the urgency level of the examination
Answer: A
Question: 2
Network forensics can be defined as the sniffing, recording, acquisition and analysis of the network traffic and event logs in order to investigate a network security incident.
A. True
B. False
Answer: A
Question: 3
Which of the following commands shows you the names of all open shared files on a server and number of file locks on each file?
A. Net sessions
B. Net file C. Netconfig
D. Net share
Answer: B
Question: 4

The Recycle Bin exists as a metaphor for throwing files away, but it also allows user to retrieve and restore files. Once the file is moved to the recycle bin, a record is added to the log file that exists in the Recycle Bin.

Which of the following files contains records that correspond to each deleted file in the Recycle Bin?

A. INFO2 file B. INFO1 file C. LOGINFO2 file D. LOGINFO1 file	
	Answer: A
Question: 5	
Email archiving is a systematic approach to save and protect the data can be accessed fast at a later date. There are two main archive type Server Storage Archive. Which of the following statements is correarchives?	es, namely Local Archive and
A. It is difficult to deal with the webmail as there is no offline archive i counsel on the case as to the best way to approach and gain access to the B. Local archives do not have evidentiary value as the email client may a C. Local archives should be stored together with the server storage archina court of law D. Server storage archives are the server information and settings store the local archives are the local email client information stored on the many courts.	ne required data on servers alter the message data nives in order to be admissible ed on a local system whereas
	Answer: A
Question: 6	
Which of the following email headers specifies an address for mailer-guser" bounce messages, to go to (instead of the sender's address)?	enerated errors, like "no such
A. Errors-To header B. Content-Transfer-Encoding header C. Mime-Version header D. Content-Type header	
	Answer: A

Question: 7

Which of the following commands shows you all of the network services running on Windows-based servers?

- A. Net start
- B. Net use
- C. Net Session
- D. Net share

	Answer: A
Question: 8	
Email archiving is a systematic approach to save and protect the data can tie easily accessed at a later date.	a contained in emails so that it
A. True B. False	
	Answer: A
Question: 9	
Which of the following commands shows you the NetBIOS name table	each?
A. nbtstat -n	
B. nbtstat -c	
C. nbtstat -r	
D. nbtstat -s	
	Answer: A
Question: 10	
Windows Security Accounts Manager (SAM) is a registry file which format.	stores passwords in a hashed
SAM file in Windows is located at:	
A. C:\windows\system32\config\SAM	
B. C:\windows\system32\con\SAM	
C. C:\windows\system32\Boot\SAM	
D. C:\windows\system32\drivers\SAM	
	Answer: A
Question: 11	
Question 11	
FAT32 is a 32-bit version of FAT file system using smaller clusters a	and results in efficient storage
canacity What is the maximum drive size supported?	

capacity. What is the maximum drive size supported?

- A. 1 terabytes
- B. 2 terabytes
- C. 3 terabytes
- D. 4 terabytes

	Answer: B
Question: 12	
In which step of the computer forensics investigation methodology w the evidence?	ould you run MD5 checksum on
A. Obtain search warrantB. Evaluate and secure the sceneC. Collect the evidenceD. Acquire the data	
	Answer: D
Question: 13	
Network forensics allows Investigators to inspect network traffic and attack system Network forensics can reveal: (Select three answers)	l logs to identify and locate the
A. Source of security incidents' and network attacksB. Path of the attackC. Intrusion techniques used by attackers	
D. Hardware configuration of the attacker's system	
	Answer: A, B, C
Question: 14	

Determine the message length from following hex viewer record:

A. 6E2F

B. 13

C. 27

D. 810D

Answer: D

Question: 15

TCP/IP (Transmission Control Protocol/Internet Protocol) is a communication protocol used to connect different hosts in the Internet. It contains four layers, namely the network interface layer. Internet layer, transport layer, and application layer.

Which of the following protocols works under the transport layer of TCP/IP?

A. UDP

B. HTTP

C. FTP

D. SNMP

Answer: A

Question: 16

Which of the following statements does not support the case assessment?

- A. Review the case investigator's request for service
- B. Identify the legal authority for the forensic examination request
- C. Do not document the chain of custody
- D. Discuss whether other forensic processes need to be performed on the evidence

		Answer: C
Question: 17		
Question: 17		
measures, such as AP MAC filte Which of the following wireles	ers and Wi-Fi port access of access control attacks	network by evading WLAN access control controls. allows the attacker to set up a rogue access employees of the organization to connect to
A. War driving		
B. Rogue access points		
C. MAC spoofing		
D. Client mis-association		
		Answer: D
Question: 18		
deleted in windows7? A. The last letter of a file name	is replaced by a hex byte	er's file system. What happens when a file is code E5h T with a special character that indicates that
C. Corresponding clusters in FA	T are marked as used	
		file and does not avails space to store a new
file		
		Answer: B
Question: 19		
What is cold boot (hard boot)?		
A. It is the process of starting a B. It is the process of restarting C. It is the process of shutting CD. It is the process of restarting	a computer that is alread own a computer from a p	ly turned on through the operating system powered-on or on state
		Answer: A
Question: 20		

When a file or folder is deleted, the complete path, including the original file name, is stored in a

special hidden file called "INF02" in the Recycled folder. If the INF02 file is del when you	eted, it is re-created
A. Restart WindowsB. Kill the running processes in Windows task managerC. Run the antivirus tool on the systemD. Run the anti-spyware tool on the system	
	Answer: A
Question: 21	
WPA2 provides enterprise and Wi-Fi users with stronger data protection and newhich of the following encryption algorithm is used DVWPA2?	etwork access control
A. RC4-CCMP	
B. RC4-TKIP	
C. AES-CCMP D. AES-TKIP	
, C ₂ · \	Answer: C
Question: 22	
Question. 22	
The disk in the disk drive rotates at high speed, and heads in the disk drive a data.	re used only to read
A. True	
B. False	
<u> </u>	
	Answer: B
Question: 23	
What is a bit-stream copy?	
what is a bit stream copy.	
A. Bit-Stream Copy is a bit-by-bit copy of the original storage medium and exact copy of the original disk	
B. A bit-stream image is the file that contains the NTFS files and folders of all topartition	the data on a disk or
C. A bit-stream image is the file that contains the FAT32 files and folders of all	the data on a disk or
partition D. Creating a bit-stream image transfers only non-deleted files from the original disk to the image disk	
	Answer: A

Question: 24	
System software password cracking is defined as cracking the operating that enable a computer to function	g system and all other utilities
A. True B. False	
	Answer: A
Question: 25	
Which of the following Steganography techniques allows you to enc creation of cover for secret communication?	ode information that ensures
A. Substitution techniques B. Transform domain techniques C. Cover generation techniques D. Spread spectrum techniques	
	Answer: C
Question: 26	comparate espionage He bas
Ron. a computer forensics expert, Is Investigating a case involving recovered several mobile computing devices from the crime scene. Opossesses is a mobile phone from Nokia that was left in on condition. In number of the device to establish the identity of the device owner combinations he can use to recover the IMEI number?	One of the evidence that Ron Ron needs to recover the IMEI
A. #*06*#	
B. *#06# C. #06r	
D. *1MEI#	
	Answer: B
Question: 27	

Who is responsible for the following tasks?

Secure the scene and ensure that it is maintained In a secure state until the Forensic Team advises Make notes about the scene that will eventually be handed over to the Forensic Team

- A. Non-Laboratory Staff
- B. System administrators

C. Local managers or other nor D. Lawyers	n-forensic staff	
		Answer: A
Question: 28		
	g mechanism has not been given m ted by attackers, if the attacker wa into the log file?	- •
A. PlaintextB. Single pipe characterC. Multiple pipe charactersD. HTML tags		
		Answer: A
Question: 29		
During the seizure of digital ev	idence, the suspect can be allowed	touch the computer system.
A. True B. False		
		Answer: B
Question: 30		
	ord cracking techniques works like ords from the dictionary and tries to	a dictionary attack, but adds some crack the password?
A. Brute forcing attackB. Hybrid attackC. Syllable attackD. Rule-based attack		
		Answer: B
